The Packard Fellowships for Science and Engineering

2016 Guidelines

The Packard Fellowships for Science and Engineering program invests in future leaders who have the freedom to take risks, explore new frontiers in their fields of study, and follow uncharted paths that may lead to groundbreaking discoveries.

Program Overview

The success of the Hewlett-Packard Company has been built on technology, derived in large measure from research and development in university laboratories. Because the endowment of the David and Lucile Packard Foundation would not have been possible without the success of HP and because the research performed by university-educated engineers and scientists will provide the basis for future high-value economic activity for the nation, the Foundation has a long-standing interest in strengthening both university-based research and graduate education.

In 1988, the Foundation established the Packard Fellowships for Science and Engineering to allow the nation's most promising early career professors to pursue their science and engineering research with few funding restrictions and limited paperwork requirements.

Every year, the Foundation invites the presidents of 50 universities to nominate two early-career professors each from their institutions. Nominations are carefully reviewed by the Fellowship Advisory Panel, comprised of distinguished scientists and engineers. Eighteen recipients will receive individual grants of $875,000 distributed over five years. Of the $175,000 paid each year, $17,500 is available to the university as compensation for administrative costs.

Over 27 years, the Foundation has awarded $362 million to support over 540 scientists and engineers from 52 top national universities. It is among the nation's largest nongovernmental fellowships, designed to allow maximum flexibility on how the funding is used. Packard Fellows have gone on to receive many additional awards and honors, including the Nobel Prize in Physics; the Fields Medal; the MacArthur Fellowships; and elections to the National Academy of Sciences and the National Academy of Engineering.

What We Fund

Candidates must be faculty members who are eligible to serve as principal investigators engaged in research in the natural and physical sciences or engineering and must be within the first three years of their faculty careers. Disciplines that will be considered include physics, chemistry, mathematics, biology, astronomy, computer science, earth science, ocean science, and all branches of engineering. Candidates engaged in research in the social sciences will not be considered.

The Fellowship Program provides support for highly creative researchers early in their careers; faculty members who are well established and well-funded are less likely to receive the award. Packard Fellows are inquisitive, passionate scientists and engineers
who take a creative approach to their research, dare to think big, and follow new ideas wherever they lead.

The Foundation emphasizes support for innovative individual research that involves the Fellows, their students, and junior colleagues, rather than extensions or components of large-scale, ongoing research programs.

*Packard Fellows are inquisitive, passionate scientists and engineers who take a creative approach to their research, dare to think big and follow new ideas wherever they lead.*

What We Do Not Fund

Recognizing that certain areas of contemporary science and engineering already have access to relatively generous funding (for example, clinical research, research associated with the design and construction of large national facilities such as accelerators and space stations, and applied research of direct relevance to national security), the Packard Fellowships are directed to other, less generously supported fields.

Nomination Procedure

Nominations are requested in January of each year from the presidents of 50 universities selected by the Advisory Panel. Up to two nominations may be made by the president of each institution. Candidates must be faculty members in the first three years of their faculty careers, that is, whose initial faculty appointments began no earlier than May 31, 2013, and no later than May 31, 2016.

Selection Process

Nominations are reviewed by the Advisory Panel, which makes recommendations to the Foundation’s Board of Trustees. The Board then makes the final approval of the selected Fellows. In 2016, 18 nominees will be selected to receive the Packard Fellowship award. Packard Fellowships are awarded without regard to age, race, national origin, citizenship, religion, gender, sexual orientation, or physical disability.

Timing of Awards

*January 31, 2016* - Requests for nominations will be sent to university presidents.

*February 15, 2016* - The Foundation’s online application system will be available to nominees and referees on fellows.packard.org.

*March 15, 2016* - Nominations are due to the Foundation

*April 20, 2016* - All application materials (described below) must be submitted to the Foundation.

*October 17, 2016* - Awards will be announced

Nomination and Application Requirements

Please note that nominees will not be able to access the online application system until they have been identified to the Packard Foundation.

1. A completed nomination form from the president of the university. The nomination form, which will be mailed to the universities with the request for nominations, should state the nominee's name and contact information including email address, departmental affiliation, sponsoring institution's name, and president's name and address. It should not include any written comments.

2. An online submission by each nominee should include the following:
   - Complete contact information
   - Departmental and institutional affiliation(s)
   - Disciplinary field(s)
3. Four letters of recommendation that include the following:

- A recommendation from the nominee’s department head, which should describe first-hand knowledge of the nominee’s ability to do creative research. Nominees with joint appointments may submit a single letter signed by both department heads. Emphasis in this letter should be given to information not available in other letters of recommendation.

- Recommendations from three people outside the nominee’s university who are personally familiar with the nominee’s work and creative ability. At least one recommendation must be from a person who has had no supervisory or collaborative contact with the nominee.

Letters of recommendation may be submitted through file upload on the Foundation’s online application system or sent directly to Foundation staff by email or standard mail. Due to poor reproduction, letters should not be submitted by facsimile. Letters should not exceed two pages, and should be prepared in 12-point font with 1-inch margins. It should be noted that the referee will not have access to the online system until the nominee enters their name and contact information into the system.

**Reporting Requirements**

The Packard Fellowship Program seeks to keep reporting requirements to a minimum for active Fellows. However, because this award is dependent upon satisfactory research progress, Fellows must file annual narrative and financial reports.

- The narrative report must be filed online (fellows.packard.org) by October 15 of each year and consists of a brief, two page description of research progress, a publication list, and updated curriculum vitae information.

- The financial report must be submitted by December 31 of each year and should outline actual expenditures and the award balance for the reporting period, as well as cumulative figures for the entire grant period. The financial report should be submitted by a university’s financial office on behalf of the Fellow.

Fellows within the first five years of their fellowship will be invited to participate in the annual Packard Fellows Meeting, which is held each fall in Monterey, California. Fellows are expected to give an oral presentation on their work in their first and fifth years and are encouraged to make poster presentations in other years.
Fellowship Advisory Panel

Richard B. Alley, Pennsylvania State University
Kristi A. Anseth, University of Colorado at Boulder
Frances H. Arnold, California Institute of Technology
Jennifer A. Doudna, University of California, Berkeley
Martin Gruebele, University of Illinois, Urbana-Champaign
Cynthia Kenyon, University of California, San Francisco
Andrei Y. Okounkov, Columbia University
Stephen R. Quake, Stanford University
Robert J. Schoelkopf, Yale University
Christopher W. Stubbs, Harvard University
Eva Tardos, Cornell University
Susan S. Taylor, University of California, San Diego

Invited Institutions

Brown University
California Institute of Technology
Carnegie Mellon University
Columbia University
Cornell University
Duke University
Georgia Institute of Technology
Harvard University
Johns Hopkins University
Massachusetts Institute of Technology
Michigan State University
New York University
North Carolina State University
Northwestern University
Ohio State University
Pennsylvania State University
Princeton University
Rice University
Stanford University
Texas A&M University
The State University of New Jersey – Rutgers
SUNY at Stony Brook
University of Arizona
University of California, Berkeley
University of California, Davis
University of California, Irvine
University of California, Los Angeles
University of California, San Diego
University of California, San Francisco
University of California, Santa Barbara
University of California, Santa Cruz
University of Chicago
University of Colorado, Boulder
University of Illinois, Urbana-Champaign
University of Maryland, College Park
University of Massachusetts, Amherst
University of Michigan
University of Minnesota – Twin Cities
University of North Carolina, Chapel Hill
University of Pennsylvania
University of Rochester
University of Southern California
University of Texas at Austin
University of Texas, Southwestern Medical Center
University of Utah
University of Virginia
University of Washington
University of Wisconsin – Madison
Washington University in St. Louis
Yale University
Program Modifications

This program may be modified from time to time as experience is gained from its operation. Suggestions for modification will be solicited on a continuing basis from the Fellowship Advisory Panel and from the Fellows. The Board of Trustees of the David and Lucile Packard Foundation reserves the right to make any changes it considers desirable at any time.

How To Reach Us

Fellowships for Science and Engineering
Conservation and Science Program
The David and Lucile Packard Foundation
343 Second Street
Los Altos, California 94022
Phone: 650-917-7275
Fax: 650-948-2957
Email: fellows@packard.org

The online application and reporting system is found at fellows.packard.org.
