

# Packard Fellowships for Science and Engineering

---

## 2025 Guidelines

The [Packard Fellowships for Science and Engineering Program](#) invests in future leaders who have the freedom to take risks, explore new frontiers in their fields of study, and follow uncharted paths that may lead to groundbreaking discoveries.

## Program Overview

The success of the Hewlett-Packard Company was built on technology, derived in large measure from research and development in university laboratories. Because the endowment of the David and Lucile Packard Foundation would not have been possible without the success of HP, and because the research performed by university-educated engineers and scientists will provide the basis for future high-value economic activity for the nation, the Foundation has a long-standing interest in strengthening both university-based research and graduate education.

In 1988, the Foundation established the Packard Fellowships for Science and Engineering to allow the nation's most promising early career professors to pursue their science and engineering research with few funding restrictions and limited paperwork requirements.

Every year, the Foundation invites the presidents of 50 universities to nominate two early-career professors each from their institutions. Nominations are carefully reviewed by the [Fellowship Advisory Panel](#), composed of distinguished scientists and engineers. 20 recipients will receive individual grants of \$875,000 distributed over five years. Of the \$175,000 paid each year, \$17,500 is available to the university as compensation for administrative costs.

Over the past 36 years, the Foundation has awarded \$500 million to support over 700 scientists and

engineers from 56 top national universities. It is among the nation's largest nongovernmental fellowships, designed to allow maximum flexibility on how the funding is used. Packard Fellows have gone on to receive many additional awards and honors, including Nobel Prizes in Chemistry and Physics, Fields Medals, Alan T. Waterman Awards, Breakthrough Prizes and elections to the National Academies of Sciences, Engineering and Medicine.

## What We Fund

Candidates must be faculty members who are eligible to serve as principal investigators engaged in research in the natural and physical sciences or engineering and must be within the first three years of their faculty careers. Disciplines that will be considered include physics, chemistry, mathematics, biology, astronomy, computer science, earth science, ocean science, and all branches of engineering. Candidates engaged in research in the social sciences will not be considered.

The Fellowship Program provides support for highly creative researchers early in their careers; faculty members who are well-established and well-funded are less likely to receive the award. Packard Fellows are inquisitive, passionate scientists and engineers who take a creative approach to their research, dare to think big, and follow new ideas wherever they lead.

The Foundation emphasizes support for innovative individual research that involves the Fellows, their students, and junior colleagues, rather than extensions or components of large-scale, ongoing research programs.

## Diversity, Equity, and Inclusion

The Foundation's goals and how we carry out our work reflect our commitment to diversity, equity, and inclusion. In 2021, the Foundation [piloted](#) a program to offer additional funding support to Fellows for activities that help increase diversity and representation in science and engineering – whether in their research group, department, university, or scientific fields. The second year of the pilot began in 2022 and continued into 2023. We reviewed the pilot in 2024 and hope to share an invitation and details regarding a continuation of this funding with the 2025 Fellows at the beginning of their grant period.

## What We Do Not Fund

Recognizing that certain areas of contemporary science and engineering already have access to relatively generous funding (for example, clinical research, research associated with the design and construction of large national facilities such as accelerators and space stations, and applied research of direct relevance to national security), the Packard Fellowships are directed to other, less generously supported fields.

## Nomination Procedure

Nominations are requested in January of each year from the presidents of 50 universities selected by the Advisory Panel. Up to two nominations may be made by the president of each institution. Candidates must be faculty members in the first three years of their faculty careers, that is, whose initial faculty appointments began no earlier than May 31, 2022, and no later than May 31, 2025.

The Foundation will host “Nomination Office Hours” for faculty members who might have specific questions about their eligibility for the 2025 Packard Fellowships. These meetings are optional and will not have any influence in the review process. Please click [here](#) to sign up for an appointment.

## Selection Process

Nominations are reviewed by the Advisory Panel, which makes recommendations to the Foundation's Board of Trustees. The Board then makes the final approval of the selected Fellows. In 2025, 20 nominees will be selected to receive the Packard Fellowship award. Packard Fellowships are awarded without regard to age, race, national origin, citizenship, religion, gender, sexual orientation, or physical disability.

## Timing of Awards

**January 31, 2025** - Requests for nominations will be sent to university presidents.

**February 15, 2025** - The Foundation's online application system will be available to nominees and referees on [fellows.packard.org](https://fellows.packard.org).

**March 15, 2025** - Nominations are due to the Foundation.

**April 20, 2025** - All application materials (described below) must be submitted to the Foundation.

**October 15, 2025** - Awards will be announced.

## Nomination and Application Requirements

Please note that nominees will not be able to access the online application system until they have been identified to the Packard Foundation.

1. A completed nomination form from the president of the university. The nomination form, which will be emailed to the universities with the request for nominations, should state the nominee's name

and contact information including email address, departmental affiliation, sponsoring institution's name, and president's name and address. It should not include any written comments.

2. An online submission by each nominee should include the following:

- Complete contact information
- Departmental and institutional affiliation(s)
- Disciplinary field(s)
- Educational background
- Professional positions held
- Honors and awards
- Current external research support
- Publications
- Research statement

The research statement should describe why the research is important and outline the general goals for the next five years. The statement should also indicate, in general, how funds will be used. This does not need to be a detailed budget and will not be binding on the actual use of funds. The research statement is limited to 1,400 words (maximum two pages of text, prepared in 12-point font with 1-inch margins). If there are relevant figures, images or references, please include these separately on a third page.

3. Four letters of recommendation that include the following:

- A recommendation from the nominee's department head, which should describe first-hand knowledge of the nominee's ability to do creative research. Nominees with joint appointments may submit a single letter signed by both department heads. Emphasis in this letter should be given to information not available in other letters of recommendation.

- Recommendations from three people outside the nominee's university who are personally familiar with the nominee's work and creative ability. At least one recommendation must be from a person who has had no supervisory or collaborative contact with the nominee.

Letters of recommendation may be submitted through file upload on the Foundation's online application system or sent directly to Foundation staff by email. Letters should not exceed two pages and should be prepared in 12-point font with 1-inch margins. It should be noted that the referee will not have access to the online system until the nominee enters their name and contact information into the system.

## Reporting Requirements

The Packard Fellowship Program seeks to keep reporting requirements to a minimum for active Fellows. However, because this award is dependent upon satisfactory research progress, Fellows must file annual narrative reports and a final financial report.

- A narrative report must be filed online ([fellows.packard.org](http://fellows.packard.org)) by October 15 of each year and consists of a brief, two-page description of research progress, a publication list, and updated curriculum vitae information.
- A final financial report must be submitted by December 31 of the final year of the Fellowship. The report should outline actual expenditures for the entire grant period. The financial report should be submitted by the university's financial office on behalf of the Fellow.

Fellows within the first five years of their fellowship will be invited to participate in the annual Packard Fellows Meeting, which is held each fall, usually in Monterey, California. Fellows are expected to give an oral presentation on their work in their first and fifth

years and are encouraged to make poster presentations in other years.

### Fellowship Advisory Panel

Richard B. Alley, Pennsylvania State University  
Kristi S. Anseth, University of Colorado at Boulder  
Erich Jarvis, Rockefeller University  
Celeste M. Nelson, Princeton University  
Andrei Y. Okounkov, Columbia University  
Franklin M. (“Lynn”) Orr, Stanford University  
Stephen R. Quake, Stanford University  
Robert J. Schoelkopf, Yale University  
Christopher W. Stubbs, Harvard University  
Eva Tardos, Cornell University  
Sarah Tishkoff, University of Pennsylvania  
Martin Zanni, University of Wisconsin, Madison

### Invited Institutions

Brown University  
California Institute of Technology  
Carnegie Mellon University  
Columbia University  
Cornell University  
Duke University  
Georgia Institute of Technology  
Harvard University  
Johns Hopkins University  
Massachusetts Institute of Technology  
New York University  
Northwestern University  
Ohio State University  
Pennsylvania State University  
Princeton University  
Purdue University  
Rice University  
Stanford University  
SUNY at Stony Brook  
Texas A&M University  
The State University of New Jersey – Rutgers  
University of Arizona  
University of California, Berkeley

University of California, Davis  
University of California, Irvine  
University of California, Los Angeles  
University of California, San Diego  
University of California, San Francisco  
University of California, Santa Barbara  
University of California, Santa Cruz  
University of Chicago  
University of Colorado, Boulder  
University of Illinois, Urbana-Champaign  
University of Maryland, College Park  
University of Michigan  
University of Minnesota – Twin Cities  
University of North Carolina, Chapel Hill  
University of Pennsylvania  
University of Pittsburgh  
University of Rochester  
University of Southern California  
University of Texas at Austin  
University of Texas, Southwestern Medical Center  
University of Utah  
University of Virginia  
University of Washington  
University of Wisconsin, Madison  
Vanderbilt University  
Washington University in St. Louis  
Yale University

## Program Modifications

This program may be modified from time to time as experience is gained from its operation. Suggestions for modifications will be solicited on a continuing basis from the Fellowship Advisory Panel and from the Fellows. The Board of Trustees of the David and Lucile Packard Foundation reserves the right to make any changes it considers desirable at any time.

## How to Reach Us

**Fellowships for Science and Engineering** Environment and Science Program

The David and Lucile Packard Foundation

343 Second Street

Los Altos, California 94022

Phone: 650-917-7275

Email: [fellows@packard.org](mailto:fellows@packard.org)

The online application and reporting system are found at [fellows.packard.org](http://fellows.packard.org).
